| 6. Safety belt for extra security | 13. Auto-locking lever for nappy change position |
| 7. Thickly padded mat with soft cover | 14. Extremely stable on your bath |

The TUBmat® will save you more than one house pool of water per year

There's a huge difference between filling the TUBmat® bath compared to the bath tub, as you can imagine. It works out to about 90 litres difference in water per bath. Over a year, that's about 30,000 litres!

As shortages cause our water costs to increase, this will be a significant amount of money saved - better than losing it down the drain.

Bathing Benefits

Perfectly located in your bathroom: a wet area and out of your way
 You can stand comfortably while bathing your child
 You can move around the bathroom and use it, unlike movable stations
 Easy filling: connect optional TUBmat® Hose to your tap
 Easy draining: pull the plug and it drains into the bath below
 Large baby bath can be used for a child up to 4 years old
 No kneeling down like when you use the house bath
 There is little to no bending unlike when using a house bath
 You won't experience sore elbows or chest or pins and needles
 Saves an enormous amount of water compared to the house bath
 Eliminates the need to wait for your partner to help
 Saves you time as it is always ready: no time wasted in setting up
 No need for carrying a heavy bath around to empty it
 No time-consuming pushing trolleys back and forward
 Eliminates carrying your necessities back and forward

Drying Benefits

No need for partner to twist and pass baby from kneeling position
 Pick wet baby up: place on to waiting towel on mat next to bath
 No need to rest wet baby on chest while fumbling with lids
 Mat close to bath for safest transfer from bath
 No carrying wet baby from bathroom to nursery
 No need to dry baby on the floor

Changing Nappy Benefits

Water and towels are right there for washing hands before dressing baby
 Lots of room for essentials and folding nappies
 Easier to clean nappy accidents on bathroom floor than carpets
 For a really messy nappy change, easy to fill bath while watching baby: no setting up.

Other Benefits

Tough table sides next to the mat for extra roll-off protection
 Low wooden mat sides eliminating banging of face and kicking injuries
 Different leg heights and adjustable legs available
 Raised sides on mat help stop baby rolling off
 Choice of three stylish modern mat designs
 Tough and sturdy construction
 Fits 99% of baths around the world
 Easy to follow assembly directions

The worlds most comfortable
 safest to use bathing, drying and
 nappy changing system!

TUBmat®... Parenting just got easier

Imagine if you could bath, dry, and change nappies for your newborn baby or young child, comfortably standing upright. How much easier would life be? Little Bear have the answer for you: it's the world's first and it's called the TUBmat®.

The system was developed because babies outgrow available products for these jobs extremely quickly. From about the time they turn one, you are forced to wash them in your house bath. You end up on the floor kneeling down, hunched over, and feeling very uncomfortable especially in your knees. Try it yourself one day and you'll see it's a horrible position to be in — and imagine doing it regularly for 3 to 4 years...

Perfect Location

TUBmat® is the world's first patented-design bathing, drying and nappy change system that sits above the house bath, completely out of your way.

You will be able to stand upright in comfort to wash, dry and change your baby from the time you bring your newborn home up to around the age of 4. The TUBmat® puts you in a great position and gives you ready access to water when ever you need it for nappy changes, washing your hands, etc.

Bathing Benefits

Bathing your children should be enjoyable, hassle-free, and safe for both you and your baby. The TUBmat® puts you into a comfortable standing position, giving you full reach to all parts of the bath, and increasing your baby's safety. It saves you so much time as it's always ready. There's no need for setting up, moving trolleys and essentials around.

- Bath baby while you are standing
- It sits above your bath out of your way
- Always ready - No moving equipment
- No kneeling, hunched over house bath
- One person baths and dries

- Saves lots of water
- No more sore knees
- Drains into bath below
- Lots of room for essentials
- Easy to fill via vanity taps

Drying Baby Benefits

When designing the TUBmat® safety was the main priority. We wanted to create the safest way for you to be able to transfer your baby from the bath to the drying area.

The transfer needs to be easy and quick, to a nearby surface, to reduce risks. The solution is to have the bath and change mat next to each other and to have both ready without you having to fumble around.

Pulling lids up and down while holding your wet, slippery baby, passing your baby whilst on your knees or having to stand up while lifting baby yourself are all unsafe. So we designed the system to reduce transfer time and eliminate fumbling with lids, towels etc.

Safest Transfer

You simply lift baby out of the tub and place him or her on to a towel on the mat, right next to the bath. It could not be any easier or safer: it's the world's safest solution for you and your baby.

Using the TUBmat®, there is NO:

- passing to partner
- need for partner to be home
- resting baby on chest
- kneeling and twisting
- fumbling with lids
- carrying to nursery

Changing Nappy Benefits

You'll be changing your baby's nappy many times a day for the next 2 to 3 years, so you need a changing system that is as organized as possible, with everything at your finger tips.

When it comes to changing nappies, your bathroom is the perfect room to be in. It is a wet area and has water for every need.

- Fill a container to clean baby's bottom
- Wash and dry your hands to dress baby
- Impossible to forget water. Your bathroom has it all.

What a great position to be in.

Nappy Changing Accidents

Little boys can surprise you when their nappy comes off. Just imagine, you are in the bathroom and your little boy has just weed all over the place. Accidents like this in the bathroom are easy and quicker to clean. If it was to occur in the nursery with a cot, clothes, carpet etc just imagine all the mess it would cause you and the time it would take to clean it. If you drop dirty nappies or have a spill while cleaning your baby, this is much easier to clean if its onto tiles rather than carpets. Your bathroom is the most convenient room.

The Really Messy Nappy

Sometimes as babies move around after soiling their nappy they create a huge mess that goes up their back and everywhere. When this happens you may have to bath them because a simple clean does not do the job. Your TUBmat® is there, ready to go. Just fill it while watching the baby, undress them and bath.

- No filling and emptying hassles
- No packing essentials up
- No wheeling a station to and from

You'll never be caught out with your TUBmat® It is always ready for any emergency!

Stylish Design

TUBmat® - Suits 99% of bath tubs around the world!

The TUBmat® looks great in any bathroom of any size. Perfectly suited for when you have a vanity unit right next to your bath tub.

The TUBmat® is constructed with high quality materials, is extremely sturdy and tough, and can be assembled left- or right-handed. The TUBmat® is a great choice which you will be proud of when your friends see it. You'll feel the relief of having a great product, and the decision out of your way.
